

Cedar | Release notes

EXTERNAL TESTFLIGHT · APPLE DEVICES

EARLY BETA · ANDROID TV

November 11, 2026

Version 1.0.0

Build 83

Build 83 is the first Cedar build with one number on every platform: iPhone, iPad, Apple TV, Mac and Android TV. Source Cards puts card layout, fields and tags on one page with a live preview. Jellyfin and Emby collections can become Branches, the source picker can filter its results, and SMB playback no longer stalls. On Android TV, Branch Groups arrive with every Apple TV preset, along with Top 10, For You, Upcoming and Home DVR Branches, Sleep Timer and Mark Segments.

1 Highlights

5 new

+ NEW

Source Cards

One page for card layout, fields and tags, with a preview of your last source search. New fields show video codec, bitrate, Dub · Sub and subtitles.

+ NEW

Server Collections

Jellyfin and Emby collections, including lists your server's plugins sync, become Branches in the server's order. Open a server's page and choose Branches.

Apple devices

+ NEW

Source picker filters

Set Picker Top Bar to Filters for chips that narrow one picker without changing your saved rules.

Apple devices

+ NEW

Branch Groups

Every Branch Group preset from Apple TV, from streaming services, networks and studios to genres, decades, sagas, directors and actors, plus Cross With… to combine two folders.

Android TV

+ NEW

More Branches

Top 10 Chart, Top Picks for You, Because You Watched, Upcoming, and Home DVR Branches for Recordings, Recording Now and Recorded Shows.

Android TV

2 Home and Branches

2 new, 5 improved

Clean sports cards

+ NEW

A sixth Sports Branch layout: a frosted card with the live clock, scores, records and the league.

Apple devices

Live Sports cards

IMPROVED

Scores sit along the bottom of the card, and live cards show the game clock.

Apple devices

New streaming service Branches

+ NEW

When a Branch Group preset gains services, Home offers to add them once.

Android TV

Branch editor

IMPROVED

Pick genres, studios, services, networks, keywords, languages and countries by name, choose a Trending window, feature a person, and let new Branches name themselves from their filters.

Android TV

Connected Lists

IMPROVED

Choose Trakt, MDBList or Simkl, then your Watchlist, Collection, Recommended, Favorites or your own lists.

Android TV

Top 10

IMPROVED

Titles are numbered by chart place, with a number style per Branch and movement badges.

Android TV

Folders

IMPROVED

Choose folder artwork and one card shape for the whole group. Seasonal Branches take a year.

Android TV

3 Playback and sources

2 new, 6 improved

Sleep Timer

+ NEW

Stop playback after a set time or at the end of the episode, from the player's options.

Android TV

Mark Segments

+ NEW

Mark intros, recaps, previews and credits from the player and send them in.

Android TV

IPTV playlists

IMPROVED

Switch a playlist off and on, and turn every content type off.

Tobacco Tie settings

IMPROVED

Switches for each capability, Replace Address, a Test button and Last Refreshed. On iPhone, iPad and Mac, Configure opens inside Cedar.

Apple devices

Server availability

IMPROVED

Badges fill in while a large server is still being read, with a progress notice.

Apple devices

Tag packs

IMPROVED

Read codecs, audio channels and streaming services more accurately.

Stalker portals

IMPROVED

Sign-in explains blocked, login-required and refused-MAC profiles.

Android TV

Live categories

IMPROVED

Choosing a category moves focus to the guide's first channel.

Android TV

4 Fixes

7 fixed

- SMB playback no longer stalls partway through large files. **Apple devices**
- AV1 files whose container reports the wrong bit depth now play. **Apple devices**
- Xtream playlists that send TMDB IDs as tmdb_id show Playlist Availability badges after their next refresh.
- Game cards show AET and PEN for football, and OT and SO for other sports.
- On tvOS 26, the detail page's Play button and info chips no longer look black. **Apple TV**
- Swiping to delete a Branch in Home & Branches no longer closes Settings. **iPhone, iPad**
- Continue Watching and Next Up use the same order. **Android TV**

5 Known issues

2 known issues

- Titles from SMB shares don't open in Infuse or other external players yet. Play them in Cedar. **Apple devices**
- Server Collections Branches, source picker filters and the redesigned Tobacco Tie settings aren't on Android TV yet. **Android TV**
