

Cedar | Release notes

EXTERNAL TESTFLIGHT November 4, 2026

Version 1.0.0

Build 81

Cedar Tracking grows into a full hub, with My Taste, imports, Cedar lists, Watching Now and Dropped Shows. Viewing Stats adds insights, achievements, goals and a Year in Review. On Apple TV the Live guide scrolls more smoothly, Back keeps the channel playing, and Up and Down change channel. Multiview gains Grid, Featured and Panel layouts, Live TV plays in Picture in Picture, and a long list of reports from Discord is fixed.

1 Highlights

4 new, 1 improved

+ NEW

Cedar Tracking

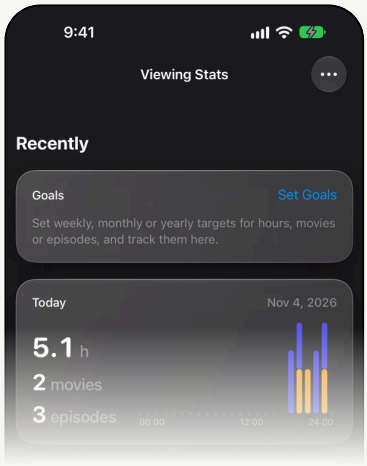

Settings › Connected Services › Cedar is now a full tracking hub with My Taste, imports from media servers and watch-history files, Cedar lists, Watching Now across your devices and Dropped Shows. Experimental.

+ NEW

Viewing Stats

Insights, achievements and goals for what you watch, plus a Year in Review. Experimental.

↗ IMPROVED

Live TV guide

Scrolls more smoothly with faded edges, and Play/Pause enlarges the player.

Apple TV

+ NEW

Multiview layouts

Choose Grid, Featured or Panel, and Arrange the channels. Experimental.

+ NEW

Picture in Picture for Live TV

Keep a channel playing in a floating window while you use the rest of Cedar.

2 Live TV, sports and DVR

5 new, 3 improved

Keep Playing in Guide

+ NEW

Back opens the guide while the channel keeps playing.

Apple TV Requested by **JaxxonDellabate** on Discord

Channel up and down

+ NEW

Up and Down on the remote change channel, and wrap around at the ends of the list.

Apple TV Requested by **JaxxonDellabate** on Discord

Listen Only

+ NEW

Listen to a Live TV channel without video, and play Live TV from CarPlay. Experimental.

iPhone

Hide sports scores

+ NEW

Choose Show, Hide While Live or Hide All.

Requested by **JaxxonDellabate** on Discord

Sports Branches

IMPROVED

Use the shared Branch editor. Showcase is sized like Feature, and the Sports Bar Poster Style is set per profile.

Requested by **JaxxonDellabate** on Discord

Sports channels

IMPROVED

Guide matching for sports channels is more accurate.

Stop Recording

+ NEW

End a Cedar Server recording early and keep what was recorded. Needs Cedar Server 1.1.0.

Requested by **RaidZilla** on Discord

6 Fixes

17 fixed

- Up Next no longer jumps to the next episode about 30 seconds in when an episode has wrong credits timing.
- Continue Watching no longer disappears after Mark as Unwatched with Simkl.
- Home Branches no longer stop at 20 titles.
- Folders no longer show as Wide.
- Jellyfin bridge-server streams no longer freeze 15 to 20 minutes in.
- Choosing a source for an episode no longer freezes. **Apple TV**
- The sports info page no longer overlaps, and its artwork is no longer zoomed. **Apple TV**
- The episode Ratings heat map can be reached. **Apple TV**
- DVR padding controls can be reached, and the record badge no longer lights on two channels with the same name.
- The scrollbar no longer sits slightly out of place. **Mac**
- Tvheadend DVB-T2 streams no longer drop.

- ✓ Silo signs in without a proxy, and Silo Library posters appear.
- ✓ Switching audio tracks no longer flashes 0:00, and Dolby Vision no longer flashes twice when changing channel or episode.
- ✓ A paused channel no longer stays paused on the next channel.
- ✓ Down no longer skips the first Branch, an empty Continue Watching leaves no gap, and the source picker keeps focus. **Apple TV**
- ✓ The Live guide sidebar can be left again. **Apple TV**
- ✓ Taps on the Home title menu always register, ratings of 0.0 are hidden, and long overlay text is no longer cut off.
